

AQ – 100 (Ampelomyces Sp.)

Microbial Solution for powdery Mildew.

Ampelomyces quisqualis is found to be very good biological fungicide against powdery mildew. It penetrates the hyphae of the fungal and restricts the growth of powdery mildew. Powdery mildew is one of the most widely occurring pathogenic fungi on many horticultural crops. It is very difficult to control when the atmosphere is cold & dry, in such a situation Ampelomyces quisqualis helps to control powdery mildew.

Microbial solution for powdery mildew. Ampelomyces quisqualis has been found to be an effective control of powdery mildew in grapes, vegetables, etc.

Very safe to use.

Composition :

Microbial Inoculum with

Nutrient Residue	: 2% w/w
CFU / gm	: 1×10^8
Moisture (Max)	: 8% w/w
Carrier (Soluble)	: 90.0% w/w
Total	: 100.00% w/w
