

Biorrhiza

Mycorrhizal Biofertilizer Organic Manure

Biorrhiza contain vascular Arbuscular mycorrhiza to boost the nutrient turnovers in the soil. It is a mutually symbiotic fungus, interacts between soil and plant provide several micro and macro nutrients from the soil to the plants.

Composition :

Organism – Vascular Arbuscular mycorrhiza Total viable propugules – 100 per gm.

Biorrhiza is recommended for all horticultural & agronomical field crops.

Benefits of Biorrhiza :

- Produce more vigorous and healthy plants.
- Increase plant establishment and survival at seeding or transplanting.
- Increase yields and crop quality.
- Improve drought tolerance, allowing watering reduction.
- Enhance flowering and fruiting.
- Optimize fertilizers use, especially phosphorus.

Application :

Soil application : Mix 3-5 kg/acre of VAM with compost and apply to an acre of soil. Apply at a depth of 2-3 cms.

Seed/Nursery bed :

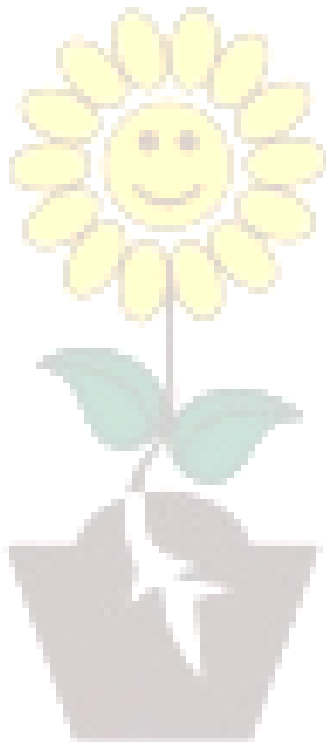

Mix 200 gm/sq.mt. along with compost

Nursery Stage :

2-5 g/seeding

Planting : 5 gm/seeding at planting time, 50 gm/medium sized tree, 200 gm/large sized trees.

Caution : Do not mix with chemical Fungicides and Fertilizer
