

BIOMIX

Soil Microflora

Biomix is a unique combination of soil microflora. It has been formulated after rigorous research studies conducted by **Shet Jameen Meemansa Prayogshala** in Laboratory and Field. It consist of all known beneficial organisms and special isolated microorganisms. It is effective against **Wilt, Stem rot, Nematodes, White grub, Termites**, etc. It is also found to reduce the incidences of fungal and bacterial spots on leaf and fruits.

Biomix is recommended for Tomato, Chili, Watermelon, Potato, Cabbage, Pomegranate, Banana, Grapes, Vegetables, etc. Biomix has very good natural growth regulating activity which help plants to become stronger and increases disease resistance in natural way.

Recommendations:

Soil Application:

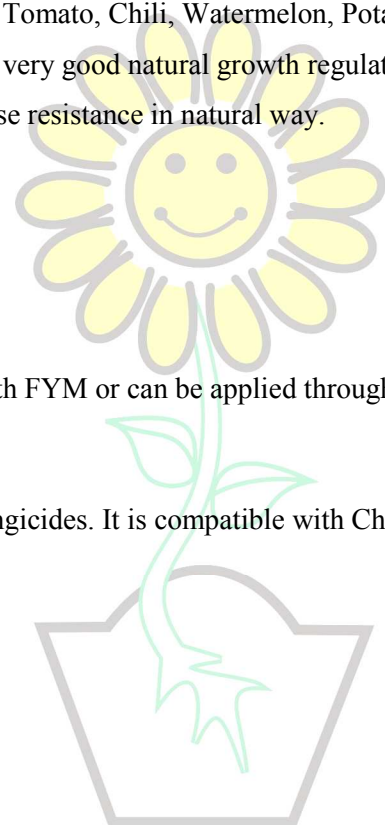

2.5 kg per acre can applied along with FYM or can be applied through drip system.

Precautions:

It is not to be used with chemical fungicides. It is compatible with Chemical insecticides and Chemical fertilizers when applied separately.

Availability:

2.5 kg pouch
