

# FER –E

## Ferrous – EDTA

Fer – E is the most stable and protected form of zinc for agricultural use. Ferrous is one of the essential element for chlorophyll formation. It is found to be deficient in most of the arid soils which requires its application. Use of chelated form is the most effective method to supplement ferrous without any ill effect on soil and plant. Application of Chelated Ferrous ensures complete utilization of used quantity.

### Contents:

Ferrous – EDTA as a Fe : 12%w/w

### Recommended crops:

It is useful for all agricultural crops.

### Dose:

1gm per lit of spray solution.

**Compatibility:**

**It is compatible with most of the insecticides & fungicides.**

**Packing available:**

**250gm.**

**Note:**

**It is eco-friendly, residue free, non-poisonous & safe to handle.**
