

ZINC -E

Zinc - EDTA

Zinc – E is the most stable and protected form of zinc for agricultural use. Zinc is one of the critical elements for plant shoot growth and fruit set. It is found to be deficient in most of the soils which requires its application. Use of chelated form is the most effective method to supplement zinc without any ill effect on soil and plant. Application of Chelated Zinc ensures complete utilization of used quantity.

Contents:

Zinc – EDTA as a Zinc : 12%w/w

Recommended crops:

It is useful for all agricultural crops.

Dose:

1gm per lit of spray solution.

Compatibility:

It is compatible with most of the insecticides & fungicides.

Packing available:

250gm.

Note:

It is eco-friendly, residue free, non-poisonous & safe to handle.
